

The natural joint nutrient designed to maximize mobility

Equitop® Gonex® contains a powerful combination of active ingredients derived from green-lipped mussel extract (GLME):

Glycosaminoglycans

- Glucosamine
- Chondroitin sulphate
- Hyaluronic acid

A high concentration of long-chain polyunsaturated fatty acids

- Omega-3 fatty acids

A special glycogen complex

The components of Equitop® Gonex® help to lubricate joints, supporting normal joint function, the stability and elasticity of ligaments, and the shock-absorbing properties of cartilage.

Equitop® Gonex® is clinically proven to significantly improve joint health in horses¹

After 56 days, use of Equitop® Gonex®*

Significantly improved movement

vs. placebo ($p < 0.001$)*

Significantly improved flexion

vs. placebo ($p < 0.001$)*

Significantly improved comfort

vs. placebo ($p < 0.001$)*

As seen in the **EQUINE VETERINARY JOURNAL!**

*In a randomized, placebo-controlled, double-blind, multicentre, partial crossover study published in the *Equine Veterinary Journal*, 26 horses were assigned to receive either 25 mg/kg of Equitop® Gonex® (n=19) or 25 mg/kg of a placebo (n=20) daily for 56 days.¹

Equitop® Gonex® frequently asked questions

What horses would benefit from Equitop® Gonex®?

Equitop® Gonex® can benefit all horses because it helps to regulate and stabilize joint and connective-tissue metabolism. In particular, this nutritional support benefits:

- Developing and growing horses by supplying important ingredients for the joints and connective-tissue metabolism
- Sport horses and horses under heavy strain by promoting stability and elasticity in the joint structures
- Ageing horses and horses with diseased joints by improving stability and elasticity in the joint structures and aids treatment of the locomotor system

Can horses taking Equitop® Gonex® be entered for competition?

Yes. Horses taking Equitop® Gonex® can be entered into competition with confidence.

Equitop® Gonex® tested free from prohibited substances.

What are the feeding recommendations for Equitop® Gonex®?

A clinical study published in the *Equine Veterinary Journal* showed that, to see the full effect, horses should take Equitop® Gonex® daily for 56 days.

- For horses, one tub of Equitop® Gonex® lasts for approximately 30 days.
- For ponies and foals, one tub will last for approximately 60 days.

Do horses like the taste of Equitop® Gonex®?

Equitop® Gonex® is formulated as tasty pearl granules and, in a field trial, it received a score of 97% palatability.

What is Equitop® Gonex® made of?

This high-quality nutritional support contains active GLME from farmed and sustainably harvested green-lipped mussels (*Perna canaliculus*), which are cultivated in controlled conditions and harvested for Equitop® Gonex® when the nutrient concentration is at its peak.

How is Equitop® Gonex® different from other types of supplements?

Equitop® Gonex® is manufactured using the same high quality standards you have come to expect from all Boehringer Ingelheim products. We also guarantee the quality and consistency of the ingredients in the product based on manufacturing standards.

Equitop® Gonex®

- Is 100% naturally sourced.
- Contains no artificial or man-made ingredients
- Contains no colourants

Recommend two tubs of Equitop® Gonex® to ensure full effect.
